INDEX TO VOLUME 32

SUBJECT INDEX

*Starred items are "Shorter Notes"

A. Algebra and Number Theory

05. Combinatorics

Carlitz, L. and Subbarao, M. V. *A simple proof of the quintuple product identity*, 42.

Chartrand, Gary, Kaugars, Agnis and Lick, Don R. *Critically n-connected graphs*, 63.

Chvátal, Václav and Harary, Frank. *Generalized Ramsey theory for graphs. II. Small diagonal numbers*, 389.

Doyen, Jean. *Constructions of disjoint Steiner triple systems*, 409.

Spence, Edward. *Hadamard designs*, 29.

06. Order, Lattices, Ordered Algebraic Structures

Bernau, S. J. *The Boolean ring generated by a distributive lattice*, 423.

08. General Mathematical Systems

Davis, Robert C. *Multivalued operations and universal coalgebra*, 385.

Iskander, A. A. *On subalgebra lattices of universal algebras*, 32.

10. Number Theory

Berndt, Bruce C. *Two new proofs of Lerch's functional equation*, 403.

Hagis, Peter, Jr. and McDaniel, Wayne L. *A new result concerning the structure of odd perfect numbers*, 13.

Williams, Kenneth S. *Representation of a binary quadratic form as a sum of two squares*, 368.

12. Algebraic Number Theory, Field Theory and Polynomials

Lando, Barbara A. *Jacobi's bound for first order difference equations*, 8.

Mordeson, J. N. and Vinograde, B. *On high order derivations of fields*, 421.

13. Commutative Rings and Algebras

Eakin, Paul and Kubota, K. K. *A note on the uniqueness of rings of coefficients in polynomial rings*, 333.

Hinohara, Yukitoshi. *On semilocal OP-rings*, 16.

Levitz, Kathleen B. *A characterization of general Z.P.I.-rings*, 376.

Reiten, Idun. *The converse to a theorem of Sharp on Gorenstein modules*, 417.

Roberts, Leslie G. K_1 *of a commutative von Neumann regular ring*, 425.

Wehlen, Joseph A. *Cohomological dimension and global dimension of algebras*, 75.

14. Algebraic Geometry

Bresinsky, H. *Semigroups corresponding to algebroid branches in the plane*, 381.

Eakin, Paul and Kubota, K. K. *A note on the uniqueness of rings of coefficients in polynomial rings*, 333.

15. Linear and Multilinear Algebra, Matrix Theory (finite and infinite)

Amir-Moéz, A. R. and Perry, C. R. *Positive transformations restricted to subspaces and inequalities among their proper values*, 363.

Kodama, Tetsuo. *On the group indices of parasymplectic group of level F*, 349.

Markham, T. L. *Factorizations of nonnegative matrices*, 45.

Sinkhorn, Richard. *Continuous dependence on A in the D_1AD_2 theorems*, 395.

16. Associative Rings and Algebras
Fein, Burton. *Embedding rational division algebras*, 427.
Fieldhouse, David J. *Regular modules*, 49.
Mason, G. R. *On self-injective group rings*, 85.
Putcha, Mohan S., Wilson, Robert S. and Yaqub, Adil. *Structure of rings satisfying certain identities on commutators*, 57.
Putcha, Mohan S. and Yaqub, Adil. *Rings satisfying monomial identities*, 52.
Rant, William H. *Left perfect rings that are right perfect and a characterization of Steinitz rings*, 81.
Wehlen, Joseph A. *Cohomological dimension and global dimension of algebras*, 75.
17. Nonassociative Rings and Algebras
Wilson, Robert Lee. *A characterization of p-reductive Lie algebras*, 89.
18. Category Theory, Homological Algebra
Hinohara, Yukitoshi. *On semilocal OP-rings*, 16.
Peake, E. James and Peters, Galen R. *Extension of algebraic theories*, 358.
Roberts, Leslie G. *K_1 of a commutative von Neumann regular ring*, 425.
Wehlen, Joseph A. *Cohomological dimension and global dimension of algebras*, 75.
20. Group Theory and Generalizations
Alperin, J. L. and Gorenstein, Daniel. *A vanishing theorem for cohomology*, 87.
Cohn, J. H. E. *A condition for a finite group to be cyclic*, 48.
Djoković, D. Ž. and Tang, C. Y. *On the Frattini subgroup of the generalized free product with amalgamation*, 21.
Hempel, John. *Residual finiteness of surface groups*, 323.
Hill, Paul. *The number of isotype and l-pure subgroups of an abelian p-group*, 69.
Hogan, Guy T. *Elements of maximal order in finite p-groups*, 37.
Johnson, C. S., Jr. and McMorris, F. R. *Injective hulls of certain S-systems over a semilattice*, 371.
Kodama, Tetsuo. *On the group indices of parasymplectic group of level F*, 349.
Mukherjee, N. P. *The hyperquasicenter of a finite group*. II, 24.
Searby, D. G. and Wamsley, J. W. *Minimal presentations for certain metabelian groups*, 342.
Sidki, Said. *Automorphism of a finite group scalar on the cosets of a subgroup*, 399.
Stebe, Peter F. *Conjugacy separability of groups of integer matrices*, 1.

B. Analysis

26. Real Functions
Vasudeva, Harkrishan. *On a characterisation of matrix functions which are differences of two monotone matrix functions*, 531.
28. Measure and Integration
Akcoglu, M. A. and Chacon, R. V. *Approximation of commuting transformations*, 111.
Kuelbs, J. and Mandrekar, V. *The Wiener closure theorems for abstract Wiener spaces*, 169.
Lewis, D. R. *A vector measure with no derivative*, 535.
Mukherjea, A. *On the convolution equation $P=P*Q$ of Choquet and Deny for probability measures on semigroups*, 457.
Pachl, Jan. *An elementary proof of a Radon-Nikodým theorem for finitely additive set functions*, 225.
Zander, Vernon. *Fubini theorems for Orlicz spaces of Lebesgue-Bochner measurable functions*, 102.

30. Functions of a Complex Variable

Bajpai, S. K. and Srivastava, R. S. L. *On the radius of convexity and starlikeness of univalent functions*, 153.

Barth, K. F. and Schneider, W. J. *On a problem of Erdös concerning the zeros of the derivatives of an entire function*, 229.

Davie, A. M. *Bounded limits of analytic functions*, 127.

Hag, Kari. *A convergence theorem for limitärperiodisch T-fractions of rational functions*, 491.

Hahn, Liang-Shin. *On the Bloch-Nevanlinna problem*, 221.

Metzger, T. A. and Rajeswara Rao, K. V. *On integrable and bounded automorphic forms*. II, 201.

Noonan, J. W. *On functions of bounded rotation*, 91.

O'Malla, Heppé. *Dirichlet finite biharmonic functions on the unit disk with distorted metrics*, 521.

31. Potential Theory

Newman, James M. *Coercive inequalities for certain classes of bounded regions*, 120.

O'Malla, Heppé. *Dirichlet finite biharmonic functions on the unit disk with distorted metrics*, 521.

Singer, Ivan J. *Dirichlet finite solutions of* $\Delta u = Pu$, 464.

32. Several Complex Variables and Analytic Spaces

Range, R. M. *A small boundary for* H^∞ *on the polydisc*, 253.

33. Special Functions

Gasper, George. *An inequality of Turán type for Jacobi polynomials*, 435.

Khan, I. A. *Generating functions for Jacobi and related polynomials*, 179.

Rowe, Paul P. *Partially-orthogonal polynomials*, 215.

34. Ordinary Differential Equations

Grimmer, R. *Stability of a scalar differential equation*, 452.

Hartman, Philip. *On invariant sets and on a theorem of Ważewski*, 511.

Hinton, Don. *Solutions of* $(ry^{(n)})^{(n)} + qy = 0$ *of class* $\mathscr{L}_s[0, \infty)$, 134.

Schrader, Keith. *Second and third order boundary value problems*, 247.

Sharma, R. R. *An abstract measure differential equation*, 503.

Teufel, Hugo, Jr. *On the behavior of solutions of sublinear second order differential equations*, 445.

35. Partial Differential Equations

Arena, O. *A strong maximum principle for quasilinear parabolic differential inequalities*, 497.

Kazdan, Jerry L. and Warner, Frank W. *Surfaces of revolution with monotonic increasing curvature and an application to the equation* $\Delta u = 1 - Ke^{2u}$ *on* S^2, 139.

Rosencrans, S. I. *Derivation of the Hopf-Cole solution to Burgers' equation by stochastic integrals*, 147.

Widder, D. V. *Time-variable singularities for solutions of the heat equation*, 209.

40. Sequences, Series, Summability

Isaacs, Godfrey L. *The abscissa of absolute summability of Laplace integrals*, 142.

Mazhar, S. M. *On the absolute Nörlund summability factors of infinite series*, 233.

41. Approximations and Expansions

Gregory, John. *An approximation theory for focal points and focal intervals*, 477.

Lambert, Joseph M. *Simultaneous approximation and interpolation in* l_1, 150.

Saff, E. B. *The convergence of rational functions of best approximation to the exponential function*. II, 187.

42. Fourier Analysis

Burnham, J. T. *Closed ideals in subalgebras of Banach algebras.* I, 551.

Gasper, George. *An inequality of Turán type for Jacobi polynomials*, 435.

Kaufman, R. *Sets of multiplicity and differentiable functions*, 472.

43. Abstract Harmonic Analysis

Blozinski, Anthony P. *Convolution of $L(p, q)$ functions*, 237.

Dunkl, Charles F. and Ramirez, Donald E. *Existence and nonuniqueness of invariant means on $\mathscr{L}^\infty(G)$*, 525.

Ragozin, David L. and Rothschild, Linda Preiss. *Central measures on semisimple Lie groups have essentially compact support*, 585.

Renaud, P. F. *Centralizers of the Fourier algebra of an amenable group*, 539.

44. Integral Transforms, Operational Calculus

Widder, D. V. *Time-variable singularities for solutions of the heat equation*, 209.

46. Functional Analysis

Blumenthal, Robert G. *The closed ideals of some Dirichlet and hypo-Dirichlet algebras*, 469.

Bunce, John. *Representations of strongly amenable C*-algebras*, 241.

Burnham, J. T. *Closed ideals in subalgebras of Banach algebras.* I, 551.

Conway, John B. *The compact operators are not complemented in $\mathscr{B}(\mathscr{H})$*, 549.

Eifler, Larry Q. *Peano curves in function algebras*, 537.

Gregory, John. *An approximation theory for focal points and focal intervals*, 477.

Kaufman, R. *Sets of multiplicity and differentiable functions*, 472.

Kelly, E. P., Jr. and Hogan, D. A. *Bounded, conservative, linear operators and the maximal group*, 195.

Lewis, D. R. *A vector measure with no derivative*, 535.

Range, R. M. *A small boundary for H^∞ on the polydisc*, 253.

Roth, B. *Submodules of $C(X) \times \cdots \times C(X)$*, 543.

Zander, Vernon. *Fubini theorems for Orlicz spaces of Lebesgue-Bochner measurable functions*, 102.

47. Operator Theory

Akcoglu, M. A. and Chacon, R. V. *Approximation of commuting transformations*, 111.

Conway, John B. *The compact operators are not complemented in $\mathscr{B}(\mathscr{H})$*, 549.

* Deddens, James A. *A necessary condition for quasitriangularity*, 630.

Dowson, H. R. and Spain, P. G. *An example in the theory of well-bounded operators*, 205.

* Embry, Mary R. *An invariant subspace theorem*, 331.

Kelly, E. P., Jr. and Hogan, D. A. *Bounded, conservative, linear operators and the maximal group*, 195.

Kritt, Brian. *A theory of unbounded generalized scalar operators*, 484.

McIntosh, Alan. *On the comparability of $A^{1/2}$ and $A^{*1/2}$*, 430.

Martin, R. H., Jr. *Strongly dissipative operators and nonlinear equations in a Fréchet space*, 161.

Masuda, Kyuya. *On the existence of invariant subspaces in spaces with indefinite metric*, 440.

* Ruston, Anthony F. *On operators with rational resolvent*, 329.

Simon, Barry. *A remark on groups with the fixed point property*, 623.

C. Applied Mathematics

94. Information and Communication, Circuits, Automata

Roberson, Fred A. *Recurrence and almost periodicity in a generative transformation group*, 596.

D. Geometry

50. Geometry

Narayana Rao, M. L. *A flag transitive plane of order* 49, 256.

53. Differential Geometry

Chen, Bang-yen and Ludden, Gerald D. *Riemann surfaces in complex projective spaces*, 561.

Grossman, Nathaniel. *On characterization of Riemannian manifolds by growth of tubular neighborhoods*, 556.

Kazdan, Jerry L. and Warner, Frank W. *Surfaces of revolution with monotonic increasing curvature and an application to the equation* $\Delta u = 1 - Ke^{2u}$ *on* S^2, 39.

Vilms, Jaak. *Submanifolds of Euclidean space with parallel second fundamental form*, 263.

F. Statistics and Probability

60. Probability Theory and Stochastic Processes

Brown, B. M. *Erratum to "A general three-series theorem"*, 634.

LePage, Raoul D. *Note relating Bochner integrals and reproducing kernels to series expansions on a Gaussian Banach space*, 285.

Mandrekar, V. *A characterization of oscillatory processes and their prediction*, 280.

Mukherjea, A. *On the convolution equation* $P = P * Q$ *of Choquet and Deny for probability measures on semigroups*, 457.

Park, W. J. *On the equivalence of Gaussian processes with factorable covariance functions*, 275.

Tomkins, R. J. *A generalization of Kolmogorov's law of the iterated logarithm*, 268.

Wilkins, J. Ernest., Jr. *The bold strategy in presence of house limit*, 567.

G. Topology

22. Topological Groups, Lie Groups

* Ragozin, David L. *A normal subgroup of a semisimple Lie group is closed*, 632.

Ragozin, David L. and Rothschild, Linda Preiss. *Central measures on semisimple Lie groups have essentially compact support*, 585.

Roberson, Fred A. *Recurrence and almost periodicity in a generative transformation group*, 596.

Simon, Barry. *A remark on groups with the fixed point property*, 523.

54. General Topology

Baker, Harvy Lee, Jr. *Maximal independent collections of closed sets*, 605.

Bennett, Donald E. *A sufficient condition for countable-set aposyndesis*, 578.

Canfell, M. J. *An algebraic characterization of dimension*, 619.

Chandler, Richard E. *An alternative construction of* βX *and* υX, 315.

Coppin, C. A. *Continuous functions from a connected locally connected space into a connected space with a dispersion point*, 625.

D'Aristotle, Anthony J. *A note on* $\mathcal{Z}$*-realcompactifications*, 615.

Frolík, Z. and Liu, Chen Tung. *An embedding characterization of almost realcompact spaces*, 294.
Hempel, John. *Residual finiteness of surface groups*, 323.
Kent, Joseph F. *A characterization of distal and point-distal minimal transformation groups*, 304.
Potoczny, H. B. *A nonparacompact space which admits a closure-preserving cover of compact sets*, 309.
Rice, M. D. *A short proof that metric spaces are realcompact*, 313.
Roberson, Fred A. *Recurrence and almost periodicity in a generative transformation group*, 596.
Sharma, P. L. and Naimpally, S. A. *On two problems of Harris concerning RC-proximities*, 312.
Stein, James D., Jr. *Uniform boundedness in metric spaces*, 299.

55. Algebraic Topology

Copeland, Arthur H., Jr. *H-structures on products*, 611.
* Feder, S. *On the embedding* $CP_n \subset CP_{2n}$, 327.
Gilbert, William J. *Homotopical nilpotence of the seven sphere*, 621.
Gordon, C. McA. *Twist-spun torus knots*, 319.
Gutiérrez, M. A. *An exact sequence calculation for the second homotopy of a knot*, 571.
Johnson, David Copeland. *Skeleta of complexes with low* MU_* *projective dimension*, 599.
Vogt, R. M. *A note on homotopy equivalences*, 627.

57. Manifolds and Cell Complexes

Anderson, Douglas R. *A note on the Whitehead torsion of a bundle modulo a subbundle*, 593.
* Feder, S. *On the embedding* $CP_n \subset CP_{2n}$, 327.
Gutiérrez, M. A. *An exact sequence calculation for the second homotopy of a knot*, 571.
Miller, John David. *Finite groups acting on spheres*, 289.
Roberson, Fred A. *Recurrence and almost periodicity in a generative transformation group*, 596.
* Stern, Ronald J. *The tangent microbundle of a suitable manifold*, 324.

58. Global Analysis, Analysis on Manifolds

Marsden, J. *Darboux's theorem fails for weak symplectic forms*, 590.
Singer, Ivan J. *Dirichlet finite solutions of* $\Delta u = Pu$, 464.
